

WELCOME TO THE PUBLIC MEETING

The Florida Department of Transportation (FDOT), District One, welcomes you to the Public Meeting for the proposed improvements to the intersection of Us 98 at Lyle Parkway. FDOT is hosting this Public Meeting to provide you with the opportunity to express your views about the proposed improvement. Scan the QR code to view project website for additional details.

PROJECT OVERVIEW

To reduce crashes and increase safety, the full median opening at the intersection of US 98 at Lyle Parkway will become a two-way directional median opening. A two-way directional median opening is configured so that only vehicles traveling along the main roadway can access it to make a turn. Left turn and through movements from side streets are removed. This is an interim improvement to improve visibility and simplify decision-making for drivers by managing the placement of vehicles within the median. This interim modification is expected to reduce the number of crashes at this intersection by 36%. The improvement will consist of temporary curbing being installed in the median opening by the end of this year.

Additional signs and pavement markings will also be installed to improve awareness of the intersection and reduce southbound US 98 travel speeds. The ultimate improvement consists of installing a traffic signal at the intersection. Design of the traffic signal is on-going.
