

NOTICE TO TRUCK DRIVERS

This **RED APRON** is for you!

Roundabout at SR 33 and Deen Still Road near Polk City, FL
during construction, April 21, 2016

The purpose of the **red concrete apron** on the inside circle and northwest quadrant of the roundabout is for semi-trailer tracking. It is not a separate driving lane; it is an apron specifically for the trailer of the semi-truck to track across while the truck maneuvers through the roundabout. For more information on driving through this roundabout, and the recently completed roundabout on SR 17 at Hunt Brothers Road in Lake Wales, including use of the red concrete truck apron, go to YouTube and watch:

<http://www.swflroads.com/resources/roundabouts/project-overview.html>

It's okay to use this red apron, after all it is for you!
