

Southwest Connect I-4 Corridor Master Plan Study 442512-1

Project Details	
<b>Work Type</b>	Master Plan
<b>Phase</b>	Planning
<b>Limits</b>	from west of SR 570 (Polk Parkway) to west of US 27
<b>Length</b>	27.6 miles
<b>City</b>	Lakeland Polk City
<b>County</b>	Polk
<b>Road</b>	I-4 SR 570 US 27

**About**

The Southwest Connect™ I-4 Corridor is 27.6 miles in length and is located in Polk County. I-4 supports vital commerce and tourism of the state as it connects employment and population centers, including Tampa, Lakeland, Orlando, and Daytona Beach, within central Florida. It is one of the only east-west limited access facilities in the central portion of the state along with Florida’s Turnpike. I-4 is a designated state hurricane evacuation route and part of Florida’s Strategic Intermodal System (SIS) highway network. The functional classification of I-4 within the project limits is Urban Principal Arterial – Interstate.

This segment of I-4 consists of a six-lane divided typical sections. Existing right of way along the corridor ranges from approximately 300 feet to 450 feet in width.

The Department is conducting a **Planning and Feasibility Study** from west of SR 570 (Polk Parkway) to west of US 27 in Polk County that makes up and will evaluate the future needs of the Southwest Connect™ I-4 Corridor in District One. This study will evaluate strategies for the mainline and interchanges, including managed lanes, that will improve accessibility, mobility, and safety. Results of this study will be documented in this corridor’s **Master Plan**.
