About

The Palmetto Trails Network Plan (PTNP) consists of a regional system of transportation improvements near US 41 within the City of Palmetto, Manatee County.

The project originally intended to evaluate Segments 1 and 2 according to the 2018 BUILD Grant. After some preliminary exploration identified necessary revisions to the original alignment of the network, these segments were replaced with the new Middle Segment and Northern Segment, respectively.

The Middle Segment includes the evaluation of critical trail segments between the Manatee County Area Transit Center, Palmetto Youth Center, Dr. Martin Luther King, Jr. Trail, Lincoln Memorial Middle School, and Lincoln Park as well as the rehabilitation of the historic Lincoln Tunnel under U.S. 41.

The Northern Segment includes the development and evaluation of trail segments connecting Lincoln Park and Washington Park through the neighborhoods just east of U.S. 41.

Specific right-of-way needs will be determined during this PD&E Study, with any potential acquisition occurring during the project's future design phase.
